There is a revolution taking place at the Institute for the Ultra Sound of Florida, where scientific research on non-human life is taught to kindergarten students. Connor Keane discovers that this work is his ticket to a better life. But that must be kept secret, or he could be out of a job. If someone is responsible for this horrible secret, Connor could lose everything -- even his life. In order to expose those responsible, Connor must find his way into the Institute's secrets. He'll need help from his only allies at school: the virus-addled crone and the golem who has an unrequited crush on him. But to save the real world, Connor must first face off with the virtual world of Aventurine -- a place where even the rules are different. What's new in Beat Saber: Billie Eilish - 'Therefore I Am':

The sudden ubiquity and popularity of Billie Eilish not only marks a milestone in pop culture, it also lays bare the cultural industry bias towards making up the story of popular music, rather than listening. In the last five years, Eilish has gone from being a breakout artist, who got picked up by a major label (Under the Radar), to being a Grammy winner (Best New Artist) to an international superstar (gigging at the Coachella Music Festival). LAMC is putting together a playlist of current songs in order to highlight the most infectious music. This week's song, is Billie Eilish's psychedelic and euphoric single of the moment, 'Therefore I Am' Listen to the song above on your browser or download the song from iTunes or Spotify. It's a hypnotic, psychedelic cadence - the kind of music you half-think you recognise, but can't quite place. Billie Eilish aka 18-year-old singer-songwriter Billie Eilish is all anyone is talking about, from here to Australia, right now. The sudden ubiquity and popularity of a young, likable, endlessly emo-credible pop star named Billie Eilish not only marks a milestone in pop culture, it also lays bare the cultural industry bias towards making up the story of pop music, rather than listening. It's not that the industry doesn't want her to succeed or make a dent - it's just that it's not quite ready for it; which in turn, has created a cultural void, after our six-year long hiatus from soul-shaking, boots-to-the-ground, artist rallying only to glorify music and embracing it's power. I'd wager that Billie Eilish's craft and music style would not have been allowed to rise or spread to the degree it has during the last five years, and certainly not this powerful of a spiritual fusion of sounds and stories that brings you to the edge. Where she belongs is on the streets of Middle America and the suburbs of Australia. That place still breathes and accommodates the people that want to live there. Plus Billie is just one in many more artists that matter. The few that are aligning themselves to the voices that have been long-ignored by the formerly elite and mighty arts critics.
